Local manager oversees the companies account and conducts monthly reviews.

ONGOING SUPPORT

The DataKom team is always on hand for any queries.

BUSINESS CHALLENGE

- ✓ The telephone system in place utilised outdated technology and was unable to support enterprise features such as call routing, voicemail to email and call recording. The business experienced poor broadband speeds and older handsets with no caller display.
- ✓ The company required a modern phone system with the ability to record calls whilst adhering to compliancy regulations.
- ✓ It was an important consideration to route all incoming calls. When the company number is called, calls can be routed to specific handsets and not others, such as the Managing Directors phone.
- ✓ Finally, additional handsets were necessary to fully support all required phone system features to improve daily operations and enhance the customer service provided.

Our cloud phone system with management features guarantees we are offering the best customer service possible. Caller display and the UCE application have streamlined our communications.
